**Supporting
Sustainable Energy Development world-wide
since 1991**

**Adviesbureau voor Energiestrategie
Energy Strategies for Sustainable Development**

Ter Aar, the Netherlands – Asunción, Paraguay

March 2026

The challenge: Use it wisely

This is the Voice of Energy
I am a giant electrical generator
I supply you with light and power
And I enable you to receive Speech,
Music and Image through the Ether
I am your servant and master at the same time
Therefore guard me well
Me, the genius of Energy

– Kraftwerk, 1975

Identity and Mission

Adviesbureau voor Energiestrategie (AES) is a Research and Consulting Office established in 1991

The main objective of the office is to contribute to sustainable energy development world-wide, with a specific focus on the implications of energy policies and systems on the environment and on human development

AES is a professional organisation, addressing energy and sustainable development in a strategic way

The activities of AES are guided by the motto:

Energy Strategies for Sustainable Development

Organisation and Modus Operandi

- Dipl.-Ing. Wolfgang F. Lutz, MA, founder-owner and director of AES, is an internationally recognised expert in energy and sustainable development
- AES cooperates on a regular basis with experts, consulting firms and research institutes world-wide
- Since its establishment in 1991, AES has assumed a pioneer role in advancing sustainable energy development in emerging economies and transition countries

Guiding Principles

- Professional and intellectual independence
- High-level expertise and professional competence
- Active partnership with clients and cooperation partners
- Promotion of sustainable energy policies, programmes and projects
- Synergy of theoretical know-how and practical experience
- International cooperation with experts and organisations at fair and transparent terms

Main working areas

- Sustainable energy policies, strategies and programmes
- Energy efficiency
- Renewable energy and rural energisation

Specific expertise

- National energy efficiency policies and plans
- Energy efficiency laws and regulations
- Energy efficiency standards & labelling
- Industrial and building energy efficiency
- Energy management

Services

- Energy policies and strategies
- Sustainable energy programmes and projects
- Renewable energy and rural energisation
- International energy policy dialogue and know-how transfer
- Research and expertise

Clients and projects

- Clients and projects in more than 40 countries
- Our clients are international organisations, government entities, research institutes, NGOs and private enterprises

Focus on emerging economies and transition countries

**Latin America & Caribbean, Central & Eastern Europe,
Southern Caucasus, South-East Asia, North Africa**

Some current and recent activities

- Low-GWP air conditioners and refrigerators and energy efficient cooking appliances in Panama
- National Energy Efficiency Strategy of Panama
- Advice to Caribbean OCTs Resilience, Sustainable Energy, Marine Biodiversity Programme (RESEMBID) of the European Commission
- Relaunch of energy efficiency standards & labelling programme of Algeria
- Implementation of energy efficiency standards & labelling programmes in Central America
- National energy agendas of Belize and Grenada
- Energy benchmarking, labelling and certification of public buildings in Mexico
- Transposition of EU energy labelling and ecodesign legislation in Ukraine
- Promotion of energy efficiency and renewable energy in Eastern Europe and Southern Caucasus
- Energy Efficiency Strategies and Action Plans of Antigua & Barbuda, Chile and Paraguay

Some past activities

- Research on energy efficiency standards & labelling programmes in Latin America
- Energy efficiency standards & labelling programmes in Algeria, the Andean Region, Argentina, Chile, Mexico, Peru and Russia
- Training courses on energy efficiency standards & labelling, energy audits & management
- Rural energisation programmes in Bolivia, Ecuador and Paraguay
- Research on renewable energy programmes and projects in Latin America
- Inter-parliamentarian dialogue EU – Latin America on the Promotion of Energy Efficiency
- Advice to the THERMIE Programme of the European Commission with regard to the promotion of innovative energy technologies in the European Union and technology transfer to third countries
- Advice to energy efficiency programmes of Thailand and Chile

Achievements 2015 – present

2025/26 – Energy efficiency standards for domestic cooking appliances in Panama

2023/24 – Energy efficient and low-GWP refrigerators and air conditioners in Panama

2021/22 – National Energy Efficiency Strategy of Panama published

2019–2021 – Strategy for the Energy Efficiency Standards & Labelling Programme of Algeria

2017 – Implementation Guide for Energy Efficiency Standards & Labelling Programme of Panama

2016–2018 – EU Ecodesign Directive and Regulations transposed into Ukrainian legislation

2016 – Sustainable Energy Information Centres operational in Georgia and Moldova

2015 – Publication "Energy Efficiency Standards and Labelling in Latin America – the issue of alignment and harmonisation"

Achievements 2004 – 2014

2014 – Energy benchmarking system for Federal public buildings applied in Mexico

2013 – EU Energy Labelling Directive and Commission Delegated Regulations transposed into Ukrainian national legislation

2012 – Sustainable Energy Action Plan of Antigua & Barbuda published

2011 – Regulatory Impact Assessments for refrigerators (in Chile and Mexico) and for air conditioners (in Mexico)

2011 – Regulation 97/2011 establishing procedures to determine product minimum energy performance standards in Chile

2009/10 – Virtual training courses on Energy Efficiency Standards & Labelling in Latin America and world-wide

2007/08 – Energy Efficiency Standards & Labelling Programme of Argentina enhanced and relaunched

2004/05 – National Energy Efficiency Programme of Argentina relaunched

Achievements 1995 – 2003

2003 – Guidelines and Options for the National Energy Conservation and Efficiency Programme of Argentina

2000–2004 – In-depth reviews of energy efficiency policies and programmes of Poland, Hungary, Bulgaria, Romania and Croatia published

1996 – Strategy for Energy Efficiency Standards & Labelling in the Andean Region

1995 – Training manual on energy management in industry applied by Energy Conservation Centre Thailand

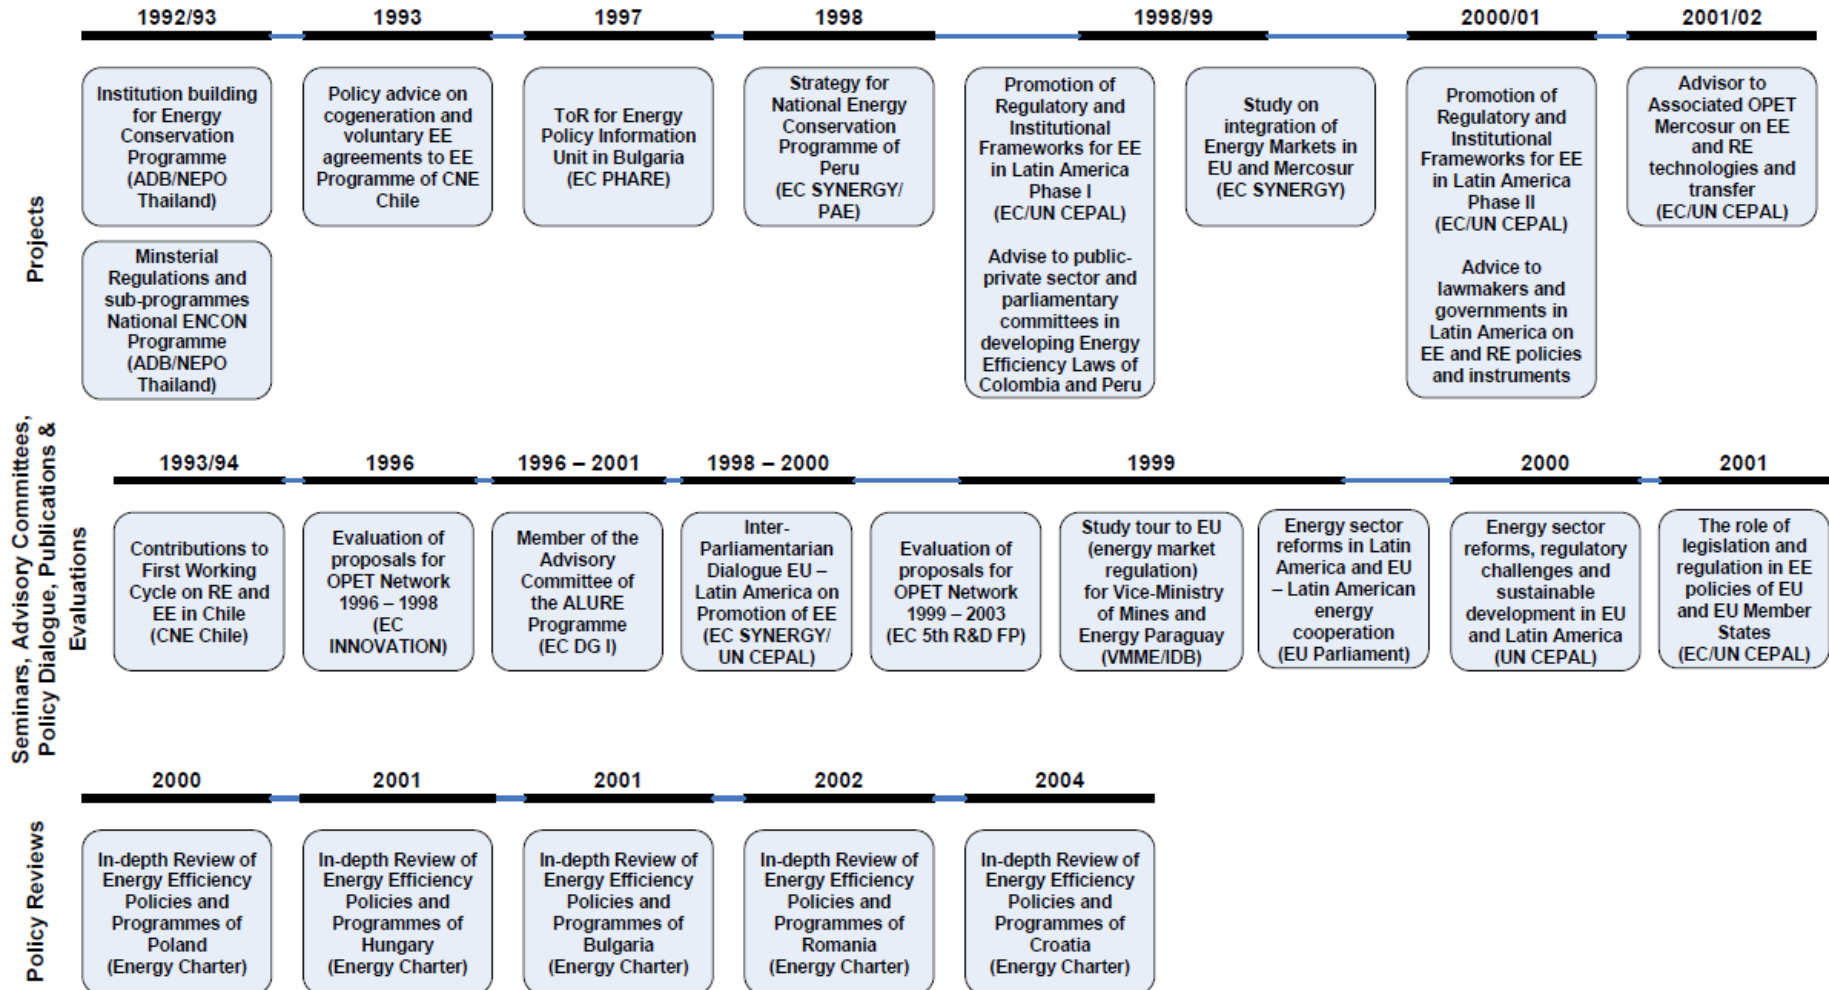

Timelines of projects and related activities

- Sustainable energy policies, strategies & legislation
- Energy efficiency standards & labelling
- Energy audits, energy management & technologies
- Renewable energy & rural energisation
