The challenge: Use it wisely

This is the Voice of Energy
I am a giant electrical generator
I supply you with light and power
And I enable you to receive Speech,
Music and Image through the Ether
I am your servant and master at the same time
Therefore guard me well
Me, the genius of Energy

– Kraftwerk, 1975

Identity and Mission

Adviesbureau voor Energiestrategie (AES) is a Research and Consulting Office established in 1991

The main objective of the office is to contribute to sustainable energy development world-wide, with a specific focus on the implications of energy policies and systems on the environment and on human development

AES is a professional organisation, addressing energy and sustainable development in a strategic way

The activities of AES are guided by the motto:

Energy Strategies for Sustainable Development

Adviesbureau voor Energiestrategie Energy Strategies for Sustainable Development

Organisation and Modus Operandi

- Wolfgang F. Lutz, Dipl.-Ing. (MSc), BA, founder-owner and director of AES is an internationally recognised expert in energy and sustainable development
- Viktoria Diachkova, Master in International Economy, executive assistant and research associate
- AES cooperates on a regular basis with experts, consulting firms and research institutes in Europe, Latin America and the USA
- AES has assumed a pioneer role in advancing sustainable energy development in emerging economies and transition countries

Adviesbureau voor Energiestrategie Energy Strategies for Sustainable Development

Guiding Principles

- High-level expertise and professional competence
- Active partnership with clients and cooperation partners
- Promotion of sustainable energy policies, programmes and projects
- Synergy of theoretical know-how and practical experience
- International cooperation with experts and organisations at fair and transparent terms

Adviesbureau voor Energiestrategie

Energy Strategies for Sustainable Development

Main working areas

- Sustainable energy policies, strategies and programmes
- Energy efficiency
- Renewable energy and rural energisation

Specific expertise

- National energy efficiency policies and plans
- Energy efficiency laws and regulations
- Energy efficiency standards & labelling
- Industrial and building energy efficiency
- Energy management

Adviesbureau voor Energiestrategie

Energy Strategies for Sustainable Development

Services

- Energy policies and strategies
- Sustainable energy programmes and projects
- Renewable energy and rural energisation
- International energy policy dialogue and know-how transfer
- Research and expertise

Clients and projects

- Clients and projects in more than 40 countries
- Our clients are international organisations, government entities, research institutes, NGOs and private enterprises

Adviesbureau voor Energiestrategie Energy Strategies for Sustainable Development

Focus on emerging economies and transition countries

**Latin America & Caribbean, Central & Eastern Europe,
Southern Caucasus, South-East Asia, North Africa**
